

## **Session C24 – Intro to Project Risk Management - SDLC Reviews**

### **About the Speakers**

#### **Greg Thomas**

Greg Thomas is a Service Line Leader in Quality Systems Management within the System Project Assurance practice and is a co-leader in the Deloitte & Touche IT change management service offering. Greg has over 15 years experience assessing, performing and implementing quality systems projects including project management and project management oversight, quality management and quality management oversight, and IT change management / change control. Greg has advised numerous System Project Assurance clients on the development and adoption of software development and quality management best practices that are designed to streamline an organization's change processes while ensuring the integrity and quality of information processing.

#### **Stephen Madler**

Stephen Madler is a Senior Manager with Deloitte & Touche and has 20 years of experience in the field of Information Technology. His background includes management of large scale custom application development efforts, IT strategic planning, business process improvement, business case development and application implementations. Prior to joining Deloitte & Touche approximately six years ago, Mr. Madler was an IT Director for two prominent Silicon Valley firms for five years each. Mr. Madler graduated from the University of San Francisco in Information Systems and is a certified project manager.
