

## **Session E32 – Minimizing Operational Risks Associated with IT Security Breaches**

### **About the Speaker**

#### **Arthur Coleman**

Arthur Coleman serves as Chief Strategy Officer at Polivec, the leading provider of security policy and compliance management software. He has 30 years experience in software marketing, e-commerce, payment systems, and online security, having been one of the early pioneers in the IT security industry from his positions at Sun Microsystems, enCommerce, and Entrust. He has taught risk analysis at Stanford and worked in failure analysis. At Sun, he spearheaded the highly successful APIs for Java Card and Java Commerce, Java Wallet, and the Java security model. He later led Sun's Banking and Payment Systems business, where he collaborated with financial institutions worldwide to deliver secure transactional systems.
