

## **Session S11 – Audit Risks and Issues for Radio Frequency Identification**

### **About the Speakers**

#### **Lionel Yee**

Lionel is a Senior Manager in Ernst & Young's Technology and Security Risk Services group. Lionel has over 10 years of information-technology-related experience and specializes in IT auditing, IT risk assessment, IT project risk management, application controls assessment and security services across various technology platforms serving clients in the entertainment, retail, manufacturing, distribution, and technology industries. Lionel is a leader in Ernst & Young's Application Controls and Security and has been involved in methodology and leading practice development. Lionel is a CISA, CISM, and CA.

#### **Sagi Leizerov**

Sagi is a leader in Ernst & Young's privacy practice, providing the firm's clients with privacy assurance and advisory services. Sagi has worked with organizations from both the private and the public sectors on privacy-related issues and served clients in the online, computer, financial, human resources, pharmaceuticals, and healthcare industries. Sagi holds a BA from the University of Maryland in behavioral sciences, an MBA with a marketing concentration from Johns Hopkins University, and a Ph.D. in conflict analysis and resolution from George Mason University. Sagi's dissertation studied the conditions and variables affecting Internet companies' approaches to privacy. Sagi's articles have appeared in both business and academic publications, and he is a frequent presenter in privacy conferences.
