

Session S31 – Personal and Corporate Identity Theft

About the Speaker

Chris Pick

As the VP of Security Management for NetIQ, Chris Pick serves as a general manager for NetIQ's security business. Working closely with NetIQ's customers, Chris is responsible for guiding market direction and ensuring effective implementation of security products on a world-wide basis. As well, as NetIQ's Chief Security Architect, he represents NetIQ at international regulatory organizations, and security management standards associations.

In addition to his current role at NetIQ, Chris is a founding member of the Information Systems Security Association's (ISSA) Security Management Benchmarking Arm – the HumanFirewall Council. As part of this organization, Chris has been the primary author of the leading industry benchmarks around Security Awareness and Security Management.

Prior to NetIQ, Chris was the Chief Security Architect for Ernst & Young, where he was responsible for founding Ernst & Young's global solutions for enterprise security. He developed many of Ernst & Young's innovative solutions around general control reviews, IT architectures, and information security management. Chris has consulted with over 70 Fortune 1000 companies around the world and assisted them in developing business-flexible security and IT infrastructures.
