

Session T2 – Best Practice and Compliance: What You Need to Know To Bridge the Gap and Meet Network Auditing Requirements

About the Speaker

David Flame

David Flame serves as BindView's Vice President of Sales and Field Operations for the Americas. In his role, he is responsible for Sales and Field Technical Services for the United States, Canada and Latin America. David is also responsible for the global Professional Services organization and for BindView's worldwide channel and partner organizations.

David is a 21-year veteran of the technology industry, with a superb record for achieving revenue and contribution targets. Prior to joining BindView, he was senior vice president of worldwide sales and services at Alphablox, an emerging platform provider for rapid development of analytic business applications. He spent six years with BMC Software in several senior-level sales positions, where he led the development of its field operations in the United States and Canada and grew BMC's Latin America business unit into the company's fastest growing and highest performing geographic region. David has also held management roles in sales, marketing and product management at IBM and Xerox.

Dave is a graduate of the University of Texas at Austin where he received a B.B.A. in Marketing Management. He has served as an Associate Professor at the University of Houston's C.T. Bauer College of Business.

Session T2 – Best Practice and Compliance: What You Need to Know To Bridge the Gap and Meet Network Auditing Requirements

About the Speaker

Thomas Moore, PhD, CISSP, CISM

Thomas Moore is a Corporate Systems Engineer for BindView where he is responsible for customer engagements, demonstrations and integrations of BindView solutions. He has more than 14 years of experience in the technology industry where he has worked in a broad realm of information security roles. Prior to joining BindView, Thomas designed perimeter security, network security architectures, network management and monitoring architectures, and developed security policies for several large, global-class companies. Among the industries in which he worked are telecommunications, health care and national defense.

Thomas has been a presenter at numerous conferences and has contributed to technical industry publications. He has also designed and developed integration software for network management systems. Thomas earned a Ph.D. in Communications from Wiltshire University. He holds an executive MBA from the University of San Moritz, and an undergraduate degree in Finance from Hawthorne University. In addition, he obtained the CISSP and CISM designations, and serves on the Board of Directors for ISACA Houston.
