

Session E21 – Intrusion Detection and Prevention

By Eugene Schultz, Lawrence Livermore National Laboratory

Topic Summary

Few areas within information security are changing as fast as is in the intrusion detection arena. What are the most significant of these changes, and what differences might they make to organizations such as yours? How has the cost to benefit ratio been altered? Was the Gartner Group correct in predicting the demise of intrusion detection? Will intrusion prevention, a closely-related area, ultimately supplant intrusion detection? This session will address these important topics.
