

Session S21 – AICPA-CICA Enterprise Wide Privacy Framework

By Doron Rotman, KPMG

Topic Summary

This session will introduce the AICPA/CICA Privacy Task Force and overview the December 2003 published AICPA/CICA Enterprise Wide Privacy Framework. This Privacy Framework of Practices and Criteria can be used to guide and assist organizations in implementing privacy programs using a standard set of privacy best practices. The AICPA/CICA received broad industry support over an extensive exposure draft process. The implementation of a sound privacy policy will assist businesses in managing privacy-related risks and complying with existing and forthcoming privacy regulations, such as the Gramm-Leach-Bliley Act and HIPAA.
