

Name:	Mick Coady
Presentation Title:	Leveraging an Identity Management Foundation to Sustain Compliance
Abstract:	
<p>Today, effective IAM is pivotal to an organization's success, regulatory compliance and ability to protect its resources. Yet many organizations face obstacles in attempting to reach that objective: the challenges of developing a strategy and implementing new technologies.</p>	
Target Audience:	
<p>Anyone who is currently struggling with spending too much money on Compliance and not utilizing Identity Management and or Access Management tools to their benefit.</p> <p>Also to learn about how roles and entitlements play a key part of deploying these tools to effectively attain appropriate levels of compliance for their organizations.</p> <p>Skill level- beginner through intermediate Occupation- Security & Audit Level- Manager, Director, VP, etc.</p>	
COBIT Objectives:	
<p>I was responding to cover "Intro to User Administration".</p>
