

Name:	Steve Romero
Presentation Title:	Beyond Mandates: Getting to “Sustainable” IT Governance Best Practices
Abstract:	IT Governance has now become part of the IT-vernacular, but what does it mean? There are now many authorities and perspectives resulting in numerous views and interpretations of IT Governance. Understanding the genesis, evolution and state of IT Governance is key to applying the discipline to any Enterprise. This session will provide that insight and show how IT Governance enables IT to effectively engage with business customers with confidence and a complete understanding of IT investments, processes, initiatives, people and finances. Attend this compelling presentation by IT Governance Evangelist Steve Romero and explore how to mature and sustain ITG processes and help achieve greater business success.
Target Audience:	Everyone – from IT Auditor to CIO
COBIT Objectives:	Addresses every aspect of COBIT
Speaker Bio:	Romero is an innovative, passionate IT professional with over 30 years experience working in almost every area of IT.
