The Convergence Challenge?

Back to Business

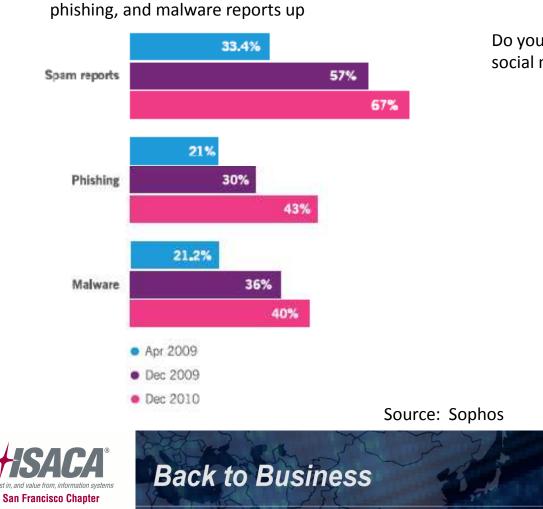

How do we protect information in a universe increasingly dominated by services (Facebook, Google+, Twitter, LinkedIn, etc.) and devices (smartphones, iPads, etc.) designed to make information transparent and portable?

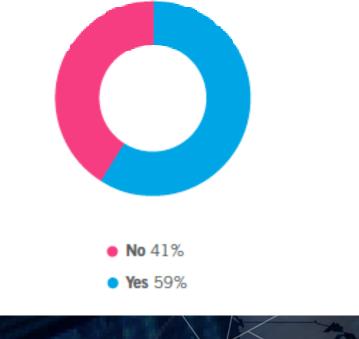

Exposing the Family Secrets

Social network spam,

Do you think your employees' behavior on social networking sites could endanger security?

Mobile Divisives?

- ~5.3B cell phones worldwide 8 out of every 10 men, women and children
- 70M cell phones lost each year

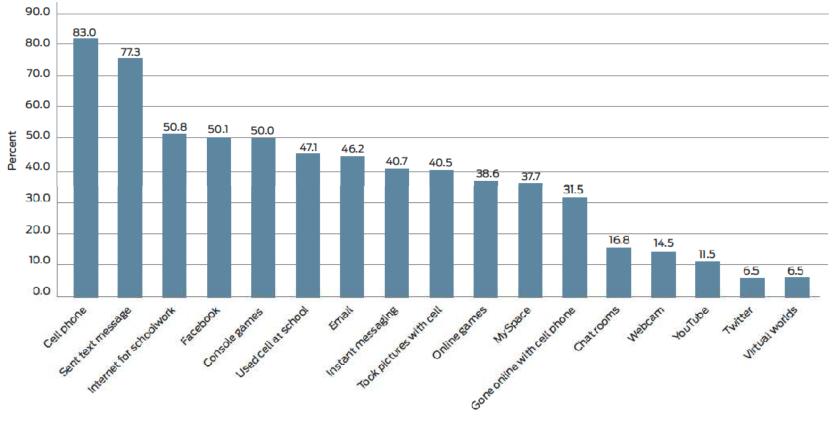

- 40% U.S. cell phone users (19% worldwide) have smartphones
- Mobile Web access projected to exceed desktop Web access by 2015
- Social networking apps are 3rd most popular for smartphones
- Only 4% of smartphones have security software installed

A Sobering Thought Re: Mobile

Teens Use of Technology Weekly Activities of 10- to 18-Year-Olds

n=4441 (random sample from large school district in southern U.S.)

What Next?

- Augmented reality combining location (GPS) information with social media "friends"
- Digital wallet very convenient … for users and hackers
- NFC (Near Field Contact) swipe device to exchange info, transfer \$\$... swap identities?
- Facial recognition Facebook image tagging already being exploited
