

Moving from Reactive to Proactive Security

Dr. Scott Jenkins

CEO, Alchemist Ventures LLC

David Snyder

VP, Secure Access Technologies Inc.

Ben Ayed

CTO, Secure Access Technologies Inc.

Professional Strategies – S11

Session Abstract

While enterprise computing is changing rapidly towards mobility, cloud and BYOD, passwords and timeouts are reaching a limit.

This session discusses new techniques for setting proactive security policies and for enforcing them in real-time using a policy dashboard, an application wrapper engine and a mobile application on the user's smart phone.

This session demonstrates how moving from reactive to proactive security results in improved security and user experience.

Target Audience

- IT Security & Compliance Professionals
- Anyone wanting to understand IT general controls, why they matter, and how to test them.

COBIT Objectives or Processes

Improved security and traceability
 Improved governance and compliance
 Improved user experience

Speaker Bio

Dr. Scott Jenkins

is CEO of Alchemist Ventures LLC and cofounder of Secure Access Technologies. Dr. Jenkins was previously CEO of Biosign Technologies Inc., listed on the TSE. Dr. Jenkins served as the VP of Worldwide Solution Sales at DELL Healthcare and Life Sciences, and held senior positions with Applied Biosystems, IBM Healthcare & Life Sciences, and Apple. Dr. Jenkins lectured at numerous worldwide conferences, including the Milken Institute, Best Practices in Personalized Medicine, The Galan Institute and Personalized Medicine World.

David Snyder

Mr. Snyder, MBA, held technology and financial management roles at Kaiser Permanente, Apple, and PayPal. He is skilled in information security, mobile health and payments systems.

Mr. Snyder organized the Mobile Health Track for the GMIC-SV mobile conference in San Francisco

and currently leads the SVForum Healthcare IT SIG. He is also a member of the Health Information Management Systems Society (HIMSS) Privacy and Security Task Force.

Ben Ayed

is the founder and CTO of Secure Access Technologies Inc. specializing in mobile access security. Ben is inventor with 20 patents issued and was previously CEO at NorkaTech, a leading developer of wireless systems. Prior to NorkaTech, Ben was with Solect (sold to Amdocs), LavaStorm (sold to Martin Dawes) and Sigma Systems (sold to Liberate).
