

RETHINKING INFORMATION SECURITY RISK MANAGEMENT

TANYA SCOTT

RISK AND CONTROLS SR. PROGRAM MANAGER, AUTODESK

PROFESSIONAL STRATEGIES – S31

Session Abstract

Many information security risk management programs are heavily focused on technical risks. Although helpful for making tactical decisions, these programs provide little information that is suitable for enterprise risk management (ERM), discussions with senior management and presentations to the Board of Directors.

Whether you are looking to build an information security risk program, or wanting to enhance an existing program, we invite you to join us for a new view of information security risk management – one that bridges the gap between strategic and tactical risk. We will explore an innovative approach and comprehensive framework of components that:

- Aligns with ERM
- Produces information for various levels of stakeholders
- Resonates with security practitioners, auditors and business leaders
- Focuses on the downside and upside of risk
- Assists management with evaluating risk treatment options

A deeper dive into some key innovative components will be provided.

Target Audience

Senior leaders/risk SMEs (more than 7+ year experience) that are struggling with implementing information security risk programs and/or communicating the organization's risk posture to senior executives.

Speaker Bio

Tanya Scott is a risk management professional with 15 years industry experience. As Risk and Controls Senior Program Manager for Autodesk, Inc., she is responsible for the enterprise information security risk management program and managing a variety of compliance initiatives. Ms. Scott has earned graduate degrees in information security, business, and physiology, and has obtained CISA, CRISC, and CGEIT certifications. She has also earned her RIMS Fellow (RF) and ARM-E designations.

Ms. Scott's true passions include simplifying overly complex concepts, challenging the status quo, and sharing her knowledge and experience with others. She has presented at several conferences including ISACA, RIMS, and Gartner Security and Risk Management Summit.
