Description:

Identity theft has become a rapidly growing crime - making headlines daily. Organizations are constantly challenged to protect the identities of their customers/employees/users and reduce business and compliance risks.

This session will provide an overview of the ID theft landscape and leading practices to mitigate risk. Government and industry initiatives to help to protect identities and provide effective governance to protect consumers will also be discussed.

Speaker Biographies

Mark Lundin

Mark is a Partner in KPMG's IT Advisory practice based in San Francisco with over fifteen years of experience in technology, audit, and financial areas.

His focus areas include IT vendor audits, developing control frameworks leveraging industry standards, and information protection technologies. Mark is actively involved in international security standards development and serves as chairman of the ISO financial services security committee.

Vijay Jajoo

Vijay is a Director in KPMG's IT Advisory practice located in the San Francisco office and has over 14 years of experience assisting clients throughout the information security lifecycle, using emerging technologies to meet their strategic objectives and mitigate business and compliance risks.

His focus has been primarily over developing IT strategy, security assessment and evaluating identity and access management architectures and implementing compliance and risk management solutions. His technical and functional security expertise includes a wide range of platforms, networks and applications.
